

FREE Reveal: Off-Grid Veteran Mark Johnson's

25 Essential DIY Projects for Self-Sufficient Living

Click to Play The Video With Sound

(Scroll down for more info)

It could be the easiest, cheapest, most disaster-resistant way to get off grid...

...with your own electricity, water, food, and more. Made entirely at home.

"Survival Sanctuary" is a guide for anyone concerned about their wellbeing. But in the end, it became something more...

That's because if you apply this knowledge today, Survival Sanctuary will forever be your one step shortcut to a safe, more independent, and self-sufficient lifestyle.

Here's Just A Glimpse of What You'll Find in 'Survival Sanctuary':

Survival Sanctuary is a book you'll want to have close by. On your bookshelf, in your car, or in your bug out.

Drawing on Mark Johnson's breakthrough S.C.A.R methodology, he "stole" from the US military, to give you the most robust off-grid system imaginable.

Packed full of beginner-friendly DIYs to support your self-reliance. Made from easily salvaged, simple to assemble parts. No special tools needed. Showing you: how to build a root cellar or bunker from scratch; assemble a wind turbine from junk, passively collect, store and purify hundreds of gallons of fresh water; set up a low-space, high-yield farm,

and even build a radio from scrap, like pencils and paperclips.

The list goes on!

Just keep in mind what you'll watch and read below is just the tip of the iceberg and there's far more locked away inside 'Survival Sanctuary'

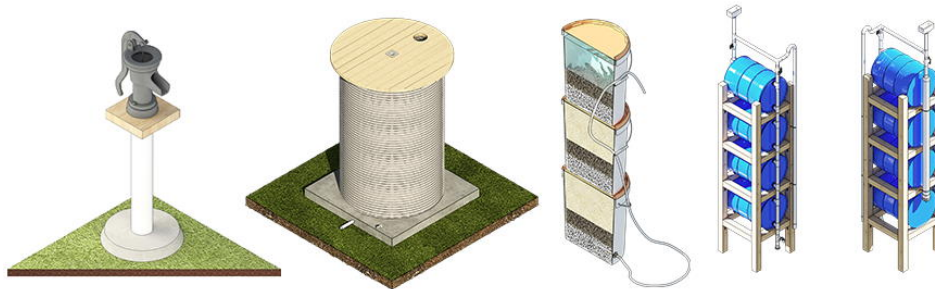

Freely Pump Gallons of Water Around Your Home Without Electricity

The DIY video you're about to see is just one of **25 similar projects** locked inside this book. No plumbing skills needed.

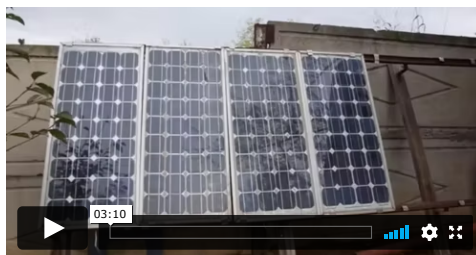

Featuring highly detailed illustrations and step-by-step instructions on how to:

- **Dig Your Own Water Well...**
For limitless free water that could cut your bills by as much as 90% overnight!
- **How to Secretly Stash Hundreds of Gallons of Water**
Invisible, even from Uncle Sam!
- **Make (Almost) Any Water Source Safe to Drink**
Thanks to a unique, chemical-free filter made from common items found in most yards.
- **Passively Collect & Store Free Rainwater**
Using a simple trick that could slash your bills by as much as \$500 and save your skin in a crisisⁱⁱⁱⁱ.

More than enough to support the 13.21 gallons of water the average person needs every day, according to experts^{iv}. Or about a bathtub every week, per person.

How to Install Solar Panels in 5 Easy Steps

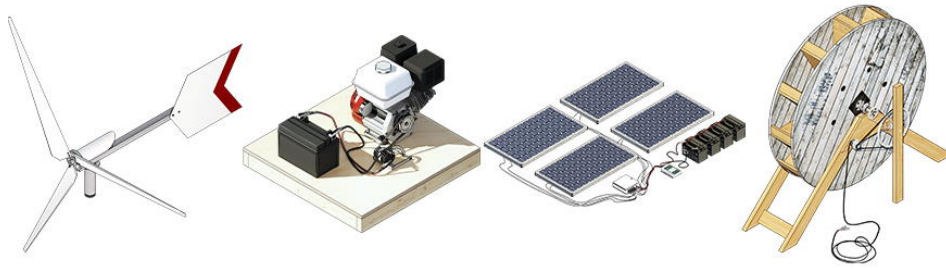

Lower your bills and protect yourself from blackouts with homemade energy.

Just **one of several similar projects** you'll find. Including...

- **How to DIY A Low-cost Wind Turbine**
That needs only a gentle breeze to output 100 watts. Or charge batteries non-stop.
- **Build A Fuel Generator from Improvised from Car Parts**
One that can fit almost any fuel type. Even in an OPEC-like oil fuel crisis.

- **A Water Wheel That Powers Homes 24/7**

Perfect for when there's no sun, wind, or other energy sources available.

Even better, these plans are 100% scalable. Need more power? Simply build another generator. All at a fraction of the \$1,500 price tag we pay (on average) for energy each month^v. Or the \$30,000+ it could cost you to have them installed professionally.

What's more, they're *disaster resilient*. This means they can take a beating. Whether it's a hurricane, EMP or something worse. Keeping you safe. No matter what.

Feed Your Family with These 4 Low-space Food Projects

Giving you the ultimate low-space (huge yield) garden. Even if you're a total gardening dunce. Including...

- **Tiny-space Plans for an Indoor Vertical Farm**

The most efficient way to get stacks of free food. Even in a city apartment. No bending or stretching needed. In fact, there's no fertilizer either!

- **The "Lazy Gardener's" Square-foot Garden**

Great for companion planting. Where every crop helps to keep the others pest-free and healthy for maximum harvest size with minimal "work".

- **An Underground (Walipini) Greenhouse**

That grows summer fruits and veg, even in winter. Without the fragility, theft worries and maintenance pain of your typical greenhouse.

- **How to Create a (Low Water) Wicking Bed**

That only needs watering every 2-3 weeks. Using 50% less H₂O than a conventional garden. Perfect for dry states like Texas, California, and more.

And not just for food. Because these projects are also great for a medicinal garden. Giving you powerful healing remedies. While also keeping you fed. But they wouldn't be complete without...

How to Make a Food Stockpile That Never (Ever!) Spoils

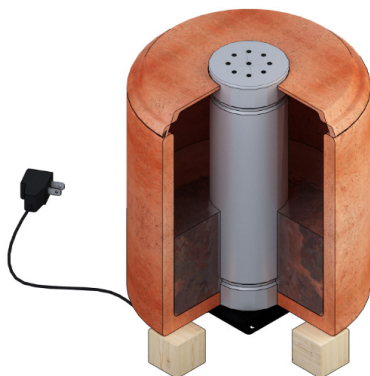

Without unreliable refrigeration, tasteless MREs, or forcing you to rebuild your supply every few weeks to avoid spoilage. AND without spilling onto every unused surface of your home like some embarrassing hoarder. Including...

- **How to Build A Solar Dehydrator**
Which uses the free power of the sun to safely preserve vegetables and meat for years.
- **Stock Food the Traditional Way with A Root Cellar**
That also doubles as an underground bunker. Perfect for stormy times. Without the dangers of re-freezing or thawing that could make food unsafe.
- **How to Build Your Own DIY Freeze-drier**
That can safely preserve food for up to 25 years. While also shrinking it. Making it easier to store.
- **And More...**

There are just so many great projects to choose from. Not all of which can be easily categorized. Like...

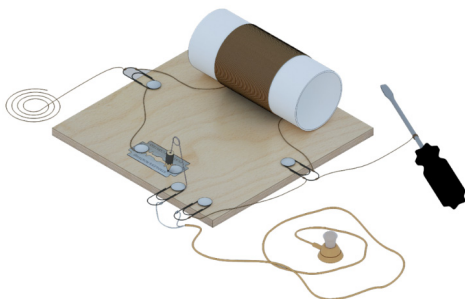

Why Not Beat Heatwaves With A DIY Air Conditioner ?

That could save you thousands on your energy bill, and keep you comfortable, even when it's 122° outside.

Critical, especially once you consider such heatwaves have tripled in recent times and are getting hotter every day. What's worse, many can be lethal. Especially for seniors, pets, and small children. Or, why not learn to...

Jerry-Rig a Radio like the POWs in WW2 Prison Camps

It's a clear no-brainer that information, like weather reports, news, or contact with loved ones can make all the difference in a survival situation. Much like it did for POWs in WW2 prison camps, where these radios were routinely disassembled, hidden, and rebuilt from ordinary items, keeping prisoners one step ahead of their captors. And finally...

**7 Top-Security Projects
Too
Risky to Show Online...**

Because, even though they're designed for self-defense, in the wrong hands these projects could cause serious harm. And once you read them, you'll know why.

Including...

- A modern variant on a medieval tool which can pierce through sheets of solid steel.
- How to deliver a stunning shock to anyone who gets too close for comfort, using a tiny change to an item you'd normally smile and say "cheese" at.
- A DIY version of a flashbang used by SWAT officers to make suspects comply...
- How to install your very own intruder alarm which, unlike an electric system, goes off with a BANG.
- Our modern interpretation of a silent hunting tool used by the natives of South American jungles (only this time we've added a laser for accuracy).
- One method to hide valuables that's more secure than a solid steel safe... because it's 100% undetectable and blends into your living space flawlessly.
- And finally, what's promised on the cover of the book. Perfect for roasting roaches on your property.

All vital projects, small and large that can safeguard your skin and make you more self-reliant.

And believe it or not, if you get 'Survival Sanctuary' now, you'll also receive **Three Special Reports, 100% Free that will be off the table soon.**

There is an old saying that goes:

"Once in a lifetime you need a doctor, a lawyer, and a priest, but every day, three times a day, you need a FARMER."

That's why **your first bonus** is:

BONUS #1: The Shoe Box Garden
\$27 NOW FREE

Our first incredible giveaway shows you how to create a steady food supply, even when space is limited. This is especially helpful in urban areas, like the suburbs, or city.

That's because when a crisis hits, the first thing to vanish is food. Therefore, it's vital to have a backup. Even a tiny garden the size of a shoebox can make all the difference.

But even if you're rural-bound, this book is a great guide to get you started with gardening on a small scale.

Or if you have family or friends in the city why not give them this book? When the need arises and food supplies take a hit, they'll thank you for it!

I gave this book to my sister and now she's giving me fresh juicy tomatoes every month (they're great).

I'm sure you're familiar with this expression too:

"An Englishman's Home is his castle."

That's because self-defense is nature's oldest law. Unless you can deter bad eggs who'd rather take from you than earn for themselves none of your preparations will help. That's why **your second bonus** is called:

BONUS #2: My American Castle \$27 NOW FREE

This second manual will do two things - educate AND entertain you. Several sections even made me laugh out loud when I read them.

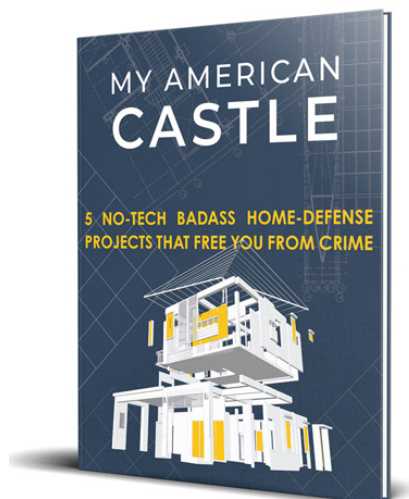

But the techniques inside - straight out of 'Nam - are no laughing matter...

Read carefully as this Vietnam Vet shows you how to turn your home or bug-out location into an impregnable fortress every roaming bandit or looter will fear.

Covering tips, like the biggest mistakes home invasion victims make, 7 booby traps for home defense, how to build a layered defense system around your home (with counter-defense fortifications, obstacles, and camouflage, inspired by Vietcong tactics), all backed by real-world statistics.

That way you know where to focus. Without waste.

I know one thing for sure... if the kid from Home Alone had read this book, the bad guys in the movie wouldn't have been back in Home Alone 2...

Another great quote is:

"Two is one, one is none".

It comes from the military and is about the value of having a backup. That's why **your third bonus** is:

BONUS #3: The Home Energy Rescue Plan \$27 NOW FREE

Electricity has undeniably improved our lives. Just like fire, or the invention of the wheel...

Without it, life would be tough.

That's why it's critical to store it. Ready for downtimes (like when there's no sun for solar panels) or you're out of gas.

This way you have power 24/7. Giving you a valuable reserve in an emergency.

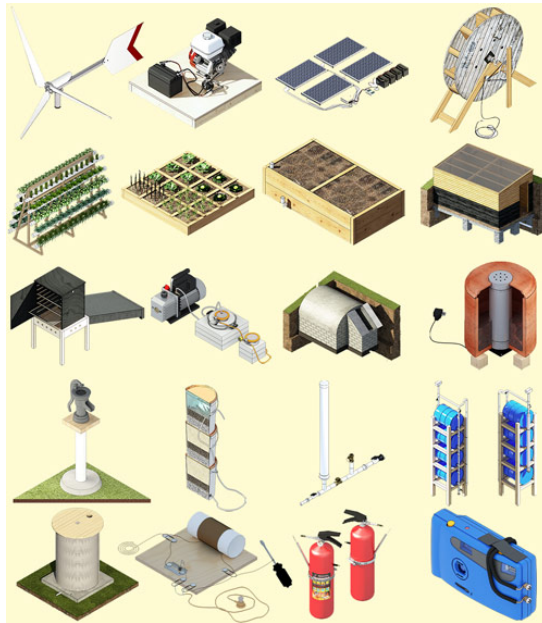

And why your final bonus shows you how to build an electrical backup, like those found in hospitals, including which batteries to use in a survival situation... and which to avoid (*spoiler*: it's a lot of the modern ones).

With this guide, you'll be able to jumpstart your energy independence right away!

*All of which are available to download digitally.

**Very Soon, All of These (And
MORE) Could Be Yours...**

But act fast!

Because only if you act now and reserve your copy of 'Survival Sanctuary' today will you secure these 3 exclusive bonuses, valued at \$27 each... FOR FREE.

Plus, gain unlimited access to our members' area, where you can ask us anything. Any time you want. We'll be there to answer all your questions and help you if you need any assistance.

Simply **click the button below** to secure your copy and become an honorary 'Survival Sanctuary' member today .

Right Now, We're Staring Into the Abyss...

Whether it's an economic crisis, earthquake, martial law, or a hundred other things. That's why seeking a life of true self-reliance, and building a bulletproof safety net - today, while you still can, is such a clear no-brainer. Right now, according to experts, 55% of Americans (193 million of us) are at high risk from natural disaster, while many say we're already in a major economic depression^{vi}. Throw into that black swan events, and the average American's all-time *self-reliance* LOW, and you can see why we feel so duty-bound to help.

But we can't do it alone.

Today you can take part in something great: boosting your self-reliance. Helping yourself, loved ones and even complete strangers with this knowledge.

Knowledge you can freely share with others once it's yours.

Everything you need is inside 'Survival Sanctuary'. And all you need to do is click the button below, quickly fill-in your details and pass through our highly secure, military-grade encryption process. Then flick through the pages and decide. Just like in an old-fashioned brick and mortar bookstore.

That's because...

You Also Get Our Handshake Guarantee...

Because remember when a man's word was his bond?

When you made an agreement and you just shook on it?

You didn't need anything more.

Frankly, I'd like to do things the old-fashioned way again. That's why, with your copy of 'Survival Sanctuary', you'll also receive our **60-day guarantee**.

As a sign of good faith.

That means, once the book is yours, all you have to do is flick over its pages, skim through the highly detailed and full-color illustrations, gaze over the easy-to-grasp instructions, and picture just how amazing these projects will look in your home. Then, once you're done, in the extremely, *highly unlikely* event you're not over the moon *thrilled* with what's inside we'll give you a full refund. You'll even get to keep the book.

Just send us an email and we'll credit it straight into your bank account within 24 hours. No ifs, no buts. You don't even have to answer any nosey questions. Simply send us a quick email to the address located in the member's area (or reply to your confirmation email) in the next 60 days.

That's it.

That's right: You have TWO MONTHS to test drive 'Survival Sanctuary', plus the three free bonuses, before you make a final decision.

That's our handshake guarantee!

So, is it a deal? I hope so!

Here's What Many Who Bought 'Survival Sanctuary' Have to Say About it:

★★★★★ **This is amazing!!!!!!!!!!!!!!** Honestly, I wish I got it before. I have never been taught this. Why isn't this being taught in school? Everyone needs this! Van, 45, TRINIDAD, W.I.

★★★★★ **Very helpful and insightful.** Thomas Conner, 59, Harker Heights, TX

★★★★★ **Easily the best book on Survival I've ever read.** Great for beginners (like me) and pros (like my old man) alike. I would HIGHLY recommend this to anyone interested in this topic. Shaun, 32, UK

★★★★★ **Very clear precise instructions** on building very useful items for your homestead. Heidi L., 54, Illinois, USA.

★★★★★ **Serious preparedness information in this book.** Easy to follow instructions are a must for the less mechanically inclined of us. Dewey L. Weaver, 63, North Alabama

★★★★★ **Chalked full of great ideas** and lifesaving methods to help even make the survival novice more prepared for any disaster. John, 56, West Virginia

★★★★★ **A lot easier to build... than originally believed.** Thank you! Oh by the way we are in our late 60's. Nancy, 66, Ohio
